

HEALTH, SAFETY AND ENVIRONMENT POLICY STATEMENT

British Steel is committed to achieving the highest industry standards of health, safety and environmental performance. We believe zero harm is achievable through engagement and continual improvement. Our board members are accountable for performance delivered through exemplary leadership standards and behaviours.

We are committed to:

Preventing all injuries, work related illness and minor/major accidents

All employees should receive suitable training on the hazards they face and the safe systems of work to control risk.

Minimising the environmental impact of our operations and products

Strive to continually improve our environmental performance, prevent pollution and conform to our compliance obligations. We will optimise our use of energy and natural resources, minimise waste and reduce our emissions to air and water through the adoption of sustainable practices.

Ensuring all employees and contractors are responsible for their own health, safety and protection of the environment. Management however are accountable

Management has the responsibility to demonstrate appropriate leadership standards and behaviours.

Ensuring all employees are engaged and competent through provision of suitable information, instruction and training

Achieving excellence in health, safety and environmental protection which will drive successful business results

Without a healthy, safe and environmentally focused operation there can be no sustainable business.

Integrating safety, health and environmental management into all our business systems and processes, and continually improving them to further enhance our performance

Actively engaging our local communities

Active engagement with the communities near our sites will allow us to understand and seek to address their concerns.

Promoting responsible procurement and product stewardship

We will encourage key suppliers and contractors to behave in an environmentally responsible manner and will promote the reuse and recycling of our products throughout their life cycle.

Minimising our greenhouse gas emissions to meet our climate change responsibilities
